

Beth Mitchell | CV 2016

A Brief History

Beth Mitchell is a Contemporary Fine Art Photographer based in Queensland, Australia. Following senior school years, largely spent out of the classroom studying and practicing photography, she discovered and developed her niche— unifying the Underwater and Conceptual Photographic Genre.

Passionate about inspiring art lovers and collectors, Beth has made impressive tracks with her electrifying array of photographic stories. Her emotive and captivating art depicts stories of beauty and ethereal themes underwater. Detailed design and handcrafted elements evoke dreamlike, yet poignantly real images.

Received very well both internationally and nationally, Beth hopes to now focus on progressing the photographic medium in the Australian art community.
